Education

Punjab University College of Information Technology
BS in Computer Science

Dec 2021 – June 2025

- CGPA: 3.96/4.0

Experience

PureLogics

Lahore, Pakistan

Mar 2025 – Present

AI Engineer

June 2026 – Present

- Engineered an end-to-end **RAG pipeline** for TMS using **ChromaDB** to map Software Requirements Specifications (SRS) against repository code, enabling automated coverage analysis and context-aware test case generation.
- Improved the reliability of **LegalBreeze**, a production legal-domain RAG chatbot, by addressing statute retrieval, jurisdiction validation, hallucination detection, claim verification, and structured response generation.

Associate AI Engineer

July 2025 – June 2026

- Led the backend and AI development of **TMS (Testing Management Suite)**, an AI-powered QA platform integrating **Jira, Bitbucket, GitHub, and payment gateways**, reducing manual QA effort by **60%**.
- Developed AI-driven testing capabilities for automated **test case generation and execution**, leveraging LLMs and browser automation to streamline software testing workflows.

AI Engineer Intern

Mar 2025 – June 2025

- Developed **RAG pipelines** and optimized LLM prompts using the **OpenAI API, Flask, and Qdrant**, improving response relevance and accuracy across AI-powered applications.

Software Engineer Intern

Lahore, Pakistan

IREG-IT

July 2024 – Aug 2024

- Co-developed **Mail Merge**, a Google Sheets add-on using Google Apps Script and PostgreSQL, reducing manual email scheduling effort by over **70%**.

Teaching Assistant

Lahore, Pakistan

Punjab University College of Information Technology

Sep 2023 – June 2025

- Mentored **300+** students across Computer Vision, OOP, Digital Logic Design, and Calculus lab courses.

Projects

Eunoia (FYP)

[github](#) [🔗](#)

- Co-developed an AI-driven mental health platform with a RAG-based chatbot using Gemini API, Chroma DB, and SBERT, achieving **90% response accuracy**; contributed to full-stack development in React & Flask.

Study Sage

[github](#) [🔗](#)

- Designed an intelligent study companion supporting context-aware Q&A, PDF summarization, and flashcard generation using LangChain, Gemini API, FAISS, and Flask; reduced study time by **35%**.

Technologies

Languages: Python, JavaScript, C++, Java, SQL

Backend & Frameworks: Django, Flask, NodeJS, ReactJS, Tailwind CSS, MongoDB, PostgreSQL, Oracle

AI/ML: LangChain, OpenAI API, Gemini API, Hugging Face, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib

Vector DBs & RAG: Chroma DB, Qdrant, FAISS, SBERT

Developer Tools: Git, GitHub, Jira, Bitbucket, Postman, Jupyter Notebook

Certifications

- LangChain for LLM App Development – DeepLearning.AI
- Multimodal RAG using Vertex AI – Google Cloud
- Building AI Agents with Google ADK – DataCamp
- Advanced RAG Applications – LinkedIn Learning
- Supervised Machine Learning – DeepLearning.AI
- AI Agents using RAG and LangChain – IBM
